

TOYOTA CELICA GT-FOUR

'97 MONTE-CARLO

1/10 電動RC市販競技レーシングカー
トヨタセリカGTFOUR
177cc/160km/h

DRIFT DRIVE MODE

Available for the first time, this model can perform a drift drive mode. This mode is activated by pulling the trigger on the right side of the car. When activated, the car will automatically shift into 4th gear and the throttle will be locked. This mode is useful for drifting and for taking corners at high speed. The car will return to normal driving mode when the trigger is released.

A 3-STEP FORWARD & REVERSE SPEED CONTROL IS INCLUDED

1/10th SCALE RADIO CONTROL FOUR WHEEL DRIVE HIGH PERFORMANCE RACING CAR
